Voiceover:

The CoP identified three target groups “subdivided unit”(SDU) households, single-parent households and elders-only households, tailored interventions address the specific needs of target group including implementation of various targeted poverty alleviation projects. The “Strive and Rise Programme” focuses on supporting secondary students from underprivileged families particularly those residing in SDUs to lift them out of intergenerational poverty. The “Pilot Programme on Community Living Room” provides additional living spaces and support services for SDU households.

The “School-based After School Care Service Scheme” enables primary students, especially from single-parent households to stay at school after school hours to receive supervised care and academic support in familiar and safe environment. This alleviates parenting pressures and facilitates parent to seek employment.

Recognising elders-only households often lack support and attention. CoP supports Government’s engagement of the Care Teams to visit and contact elderly singletons, doubletons, and three-person-and-above elderly households and refer cases in need to social welfare service units.

CoP remains committed to advancing the targeted Poverty Alleviation Strategy ensuring resources reach those most in need.
